**21a) Do you think the Local Plan should include a policy to protect the loss of existing community facilities?**

The planning system plays an important role in facilitating social interactions and creating healthy, inclusive communities (NPPF, 2012). Traditional neighbourhood planning that creates safe and secure environments, adequate open space and an environment that encourages healthy lifestyle is important for the creation of a sustainable new community. However, this alone will not create healthy, inclusive communities. The Cambridgeshire strategy for Supporting New Communities has an aim to ensure that infrastructure in new communities is designed to meet the needs of the community now and in the future. Therefore the loss of existing community facilities should be protected wherever possible.

**21a) Do you think the Local Plan should include a policy to protect the loss of existing community facilities?**

Yes – there should be an acknowledgement that public rights of way and other off-road routes are an asset to the community and developers should be required to acknowledge the importance of these connections to local people, enhance them and provide new connections where appropriate. An example of such a valuable community asset in Fenland is Woodman’s way which follows the course of the old railway line between Wimblington and March. This route, although not a public right of way, is essential to local equestrians and other non-motorised users, in providing a valuable off road long distance route to ride a horse/bike safely. The loss of such a route would have a heavy impact on walkers, cyclists and equestrians. Routes such as Woodman’s Way should be protected and enhanced in the local plan. Further provision of such routes in the local plan is important and will help encourage people to get out and about thus enhancing health and well-being in the district.

**21a) Do you think the Local Plan should include a policy to protect the loss of existing community facilities?**

Yes. Chatteris Past, Present & Future is concerned about potential loss of amenities and community facilities. In particular, this year we almost suffered the loss of the only (non-public) Swimming Pool in the town. We think that the local plan should take steps to help protect such facilities.

One way that the council could seek to do this is to promote and publicise the so-far little-used Asset of Community Value process, which was successfully used in the context of Chatteris' Empress Pool. The council could further enhance the protection this scheme offers by committing (within the plan) to respecting the ACV status of facilities when considering planning decisions.

We would also like to see an enhanced level of public consultation whenever a community facility may be threatened by development.

Asset of Community Value scheme at Fenland: <https://www.fenland.gov.uk/righttobid> My Community website guidance on ACVs: <https://mycommunity.org.uk/help-centre/resources/land-and-building-assets/assets-community-value-acv/>
